PRODUCT CERTIFIED FOR LOW CHEMICAL EMISSIONS: UL COMPGG UL 2818

Use of a leveling system during installation is strongly recommended

For installation of all polished, polished glazed, lappato, and honed porcelain/ceramic tiles, use a grout release prior to grouting to prevent absorption of the grout into the tile's micropores. Use a grout color that matches the predominant color of the tile. Refer to grout manufacturer's specifications to ensure use of proper grout. Refer to tile manufacturer's specifications to determine if the polished or honed tile is appropriate for commercial applications. Tiles with a polished finish are not appropriate for wet or exterior floor applications. Do not use acidic cleaners.

Minimum grout joint must be 3/16 inch. Please refer to the most current TCNA Handbook for installation guidelines.

Images and product samples are representative of a product's potential characteristics. There is no guarantee that the sample product or images will 100% match the product received. Field and trim tile may not be an exact match. We reserve the right to make changes to product specifications at any time without notice. Tiles are subject to variations in color, shade, sizing, surface texture and finish. Prior to installation, installer must blend tiles from several different boxes to achieve an even distribution of color range. Installer must conduct a dry mock layout under proper lighting conditions prior to installation. It is the consumer's responsibility to inspect the product prior to installation to ensure satisfaction. Once installed, the product is deemed accepted. Reference the most current TCNA Handbook, ANSI, manufacturer's specifications, and the Bedrosians Care & Maintenance guide for installation, outdoor use, care and maintenance information. Improper installation, application, and/or use voids warranty. Please visit www.bedrosians.com for current product information.
